We Grow Together...

From the CEO'S desk

STARFISH is more than just a laundry equipment manufacturer. It is a community of people who share a common vision: "We Grow Together". We believe in creating value for our customers, our company and our society as a whole.

We are passionate about understanding our customers and their needs. We work closely with them to analyze their market potential and provide them with the best solutions for their laundry business. We don't just sell machines, we build relationships.

We are proud of our high-quality products, which are designed to meet the highest standards of reliability and performance. We follow strict ISO protocols and constantly innovate to improve our machines and services. We know how important it is for our customers to offer uninterrupted laundry service to their clients, and we want to help them achieve that.

That's why we offer service plans and on-site services along with AMC. We want to ensure that our customers can run their business smoothly and hassle-free. We want to see them grow and succeed with STARFISH.

STARFISH is not just a brand, it is a family. Join us today and discover the difference.

we grow together

Spare Parts

What are spare parts?

Spare parts are components that you can swap with the ones that are worn-out, damaged, or missing in your machines. Having spare parts on hand helps you prevent delays and interruptions due to equipment failures.

Description

Spare parts are easy to install and remove from your equipment. They are made of high-quality materials that meet the standards and performance of the original parts. Spare parts can help you prolong the life and efficiency of your machines, as well as lower your maintenance expenses and downtime.

Objective of spare parts

Spare parts management is the process of making sure that you have the right spares at the right time and at the right cost. Spare parts management helps you optimize your inventory levels, avoid running out or overstocking of spares, and enhance your operational reliability and profitability.

Benefits of genuine spare parts

Genuine spare parts are the best option for your laundry equipment. They are produced by the same company that made your machines, so they are assured to fit and work as expected. Genuine spare parts also offer better quality, durability, and warranty than fake or aftermarket parts.

Spare Parts Management

There are three basic types of spare parts that you may need for your packaging equipment:

Preventive Maintenance spares: These are the spares that you replace during regular or planned maintenance activities.

Repair parts: These are the spares that you replace when a part breaks down or malfunctions during operation.

Overhaul parts: These are the spares that you replace during major overhauls or shutdowns of your equipment.
